MONITOR PERFORMANCE

The included diagnostic software shows link activity, signal level, and other diagnostics while the link is in operation. There's no need to take down the link for testing.

FLEXIBLE INSTALLATION

Do you need access to your network, but need mobility and instant access? Well, we have the solution for you with our new Wi-Linx Model 2000 wireless ethernet card! Plug the PCMCIA card into your notebook and go. Need a desktop connection? Simply plug the PCMCIA card into your PC Controller and you're connected! For building to building connectivity, plug the PCMCIA card into one of our Wi-Linx wireless bridges and now you have a wireless backbone. It's that easy!

MOBILE ACCESS

Now you can accomplish everything you need to with the new Wi-Linx Model 2000 wireless card. Walk around your office, hospital ward, or manufacturing facility while maintaining access to your IT network.

EASY TO USE

Powerpacked features include easy driver installation (Windows 95/98, NT, and QNX), Red/Green connection indicators right on the desktop, power save mode, and diagnostic software are included in this feature packed product. Switch the card between your desktop, Notebook, and PDA with ease.
